

OPENING THE DOOR

TO CLINICAL DATA TRANSPARENCY

“ Thanks to TransCelerate’s Clinical Data Transparency Initiative’s in-depth resources, we’ve been able to implement an off-the-shelf tool that effectively meets the needs of the industry. ”

“ The Clinical Data Transparency Initiative has vastly improved the connection of individuals across the industry working on the early implementation of these new policies. If each company was doing this independently, we would not be as prepared for the EMA Policy 0070 and data de-identification standards. ”

“ Application of concepts developed by the Clinical Data Transparency Initiative has significantly improved our undertaking of Policy 0070. We were able to develop a clear approach to redaction and privacy protection, helping us identify the key stakeholders and temper expectations to redact Company Confidential Information (CCI). ”
